

• HOW IT WORKS

From clicks to BPMN in 3 steps.

From raw browser events to structured process models —
without lifting a pen.

01

Record

Click **start** in Chrome DevTools. Sevenda captures everything that matters — on any website, zero configuration.

DOM mutations

● ● ● 47 events

● REC

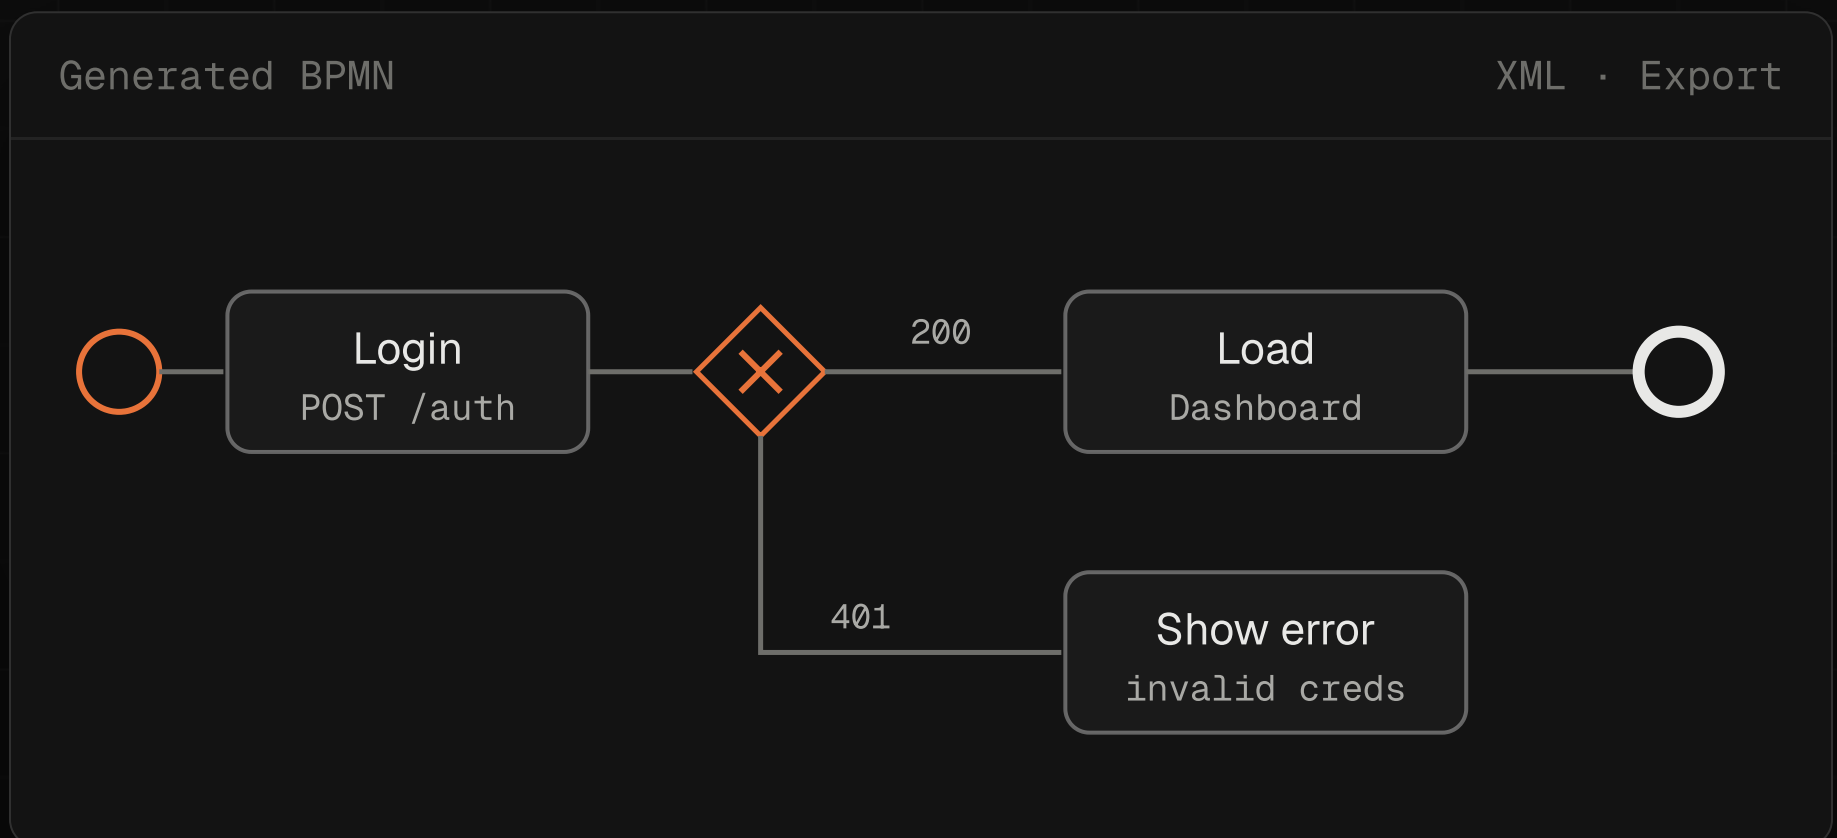

```
10:24:01 NAV pushState → /dashboard/login
10:24:02 UI click input[type=email]
10:24:03 UI click button#submit "Sign In"
10:24:03 NET POST /api/auth/login → 200 (342ms)
10:24:04 NAV pushState → /dashboard
10:24:06 NET GET /api/reports → 200 (201ms)
```

02

AI generates

Anthropic's Claude models read the event stream, identify the process flow and produce validated **BPMN 2.0** XML.
